SHOT 1 · A

0:00–0:03

Open on black. A vignette/iris lifts over 1–2s to reveal the warm room. Fireplace amber, lower-left. Slow gentle orbit.

> **GERMAN (VO)**
> *"Welcome to the Miscellaneous Manor. It can get pretty scary out there, so much doom filled, endless scrolling..."*

SHOT 1 · B

0:00–0:03

Cut to mid-shot: German in the armchair, bubble pipe, comic book, candle and side table. He glances up and notices us — small knowing smile.

SHOT 2 · A

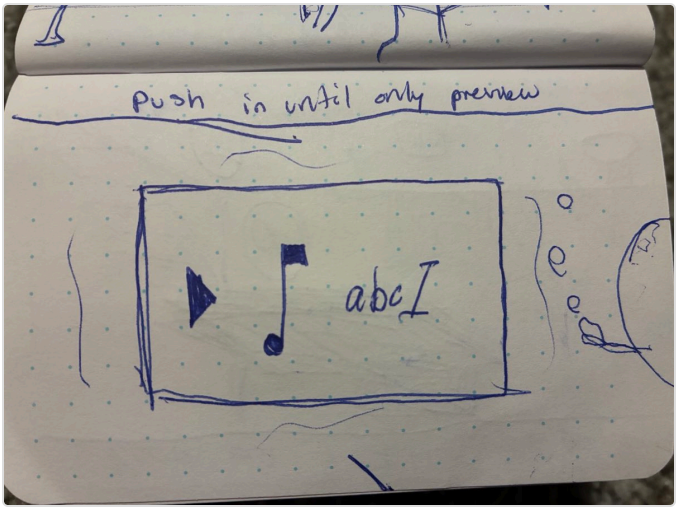

0:03–0:10

The comic lifts from his hands, swirls (~1.5s) and morphs into a floating preview card — ▶ ♪ abc — hovering above the fireplace. Sound lines radiate.

SHOT 2 · B

0:03–0:10

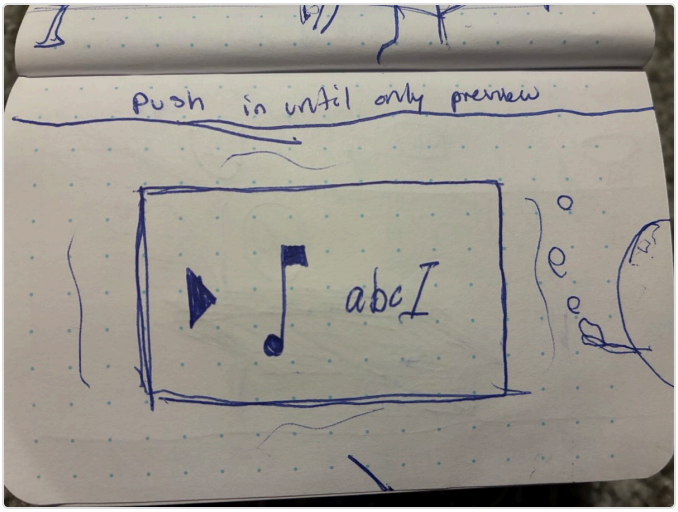

Slow 4s push-in. Depth of field holds the card sharp while the room softens behind, until only the preview fills frame.

> **GERMAN (VO)**
> *"...We think the internet could use some warmth and a little charm."*

Sketch note: "push in until only preview".

SHOT 3

0:10–0:18

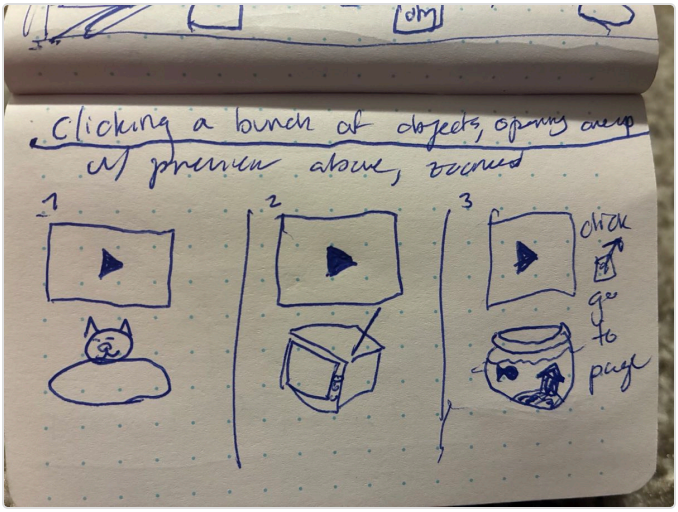

Close-up of the preview card. It floats centered, framed with a soft glow. A quiet moment to take it in — nostalgic, inviting.

> **GERMAN (VO)**
> *"Someone sent me this song, and it reminded me of a comic book I once had."*

SHOT 4

0:18–0:27

Camera orbits up around the room. Objects are live: click the cat, the TV, the fishbowl and a preview blooms above each. Soft category icons fade in over clusters.

> **GERMAN (VO)**
> *"I've kept all my digital treasures, all in one place."*

SHOT 5

0:27–0:35

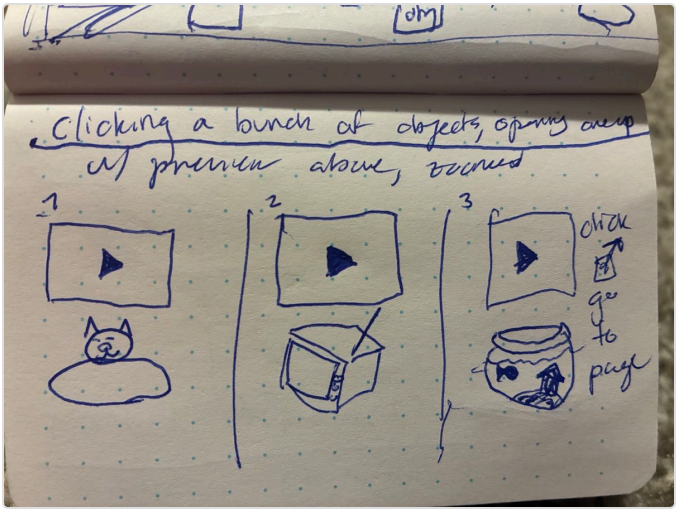

Snappy montage, 4–5 placements at 0.75–1.5s each. Plant, robot, cassette arc onto the shelf and settle with a bounce. Tactile SFX only — no UI beeps.

> **GERMAN (VO)**
> *"What would your manor look like?"*

Dialogue may span between Shots 5 and 6.

SHOT 5B

0:35–0:40

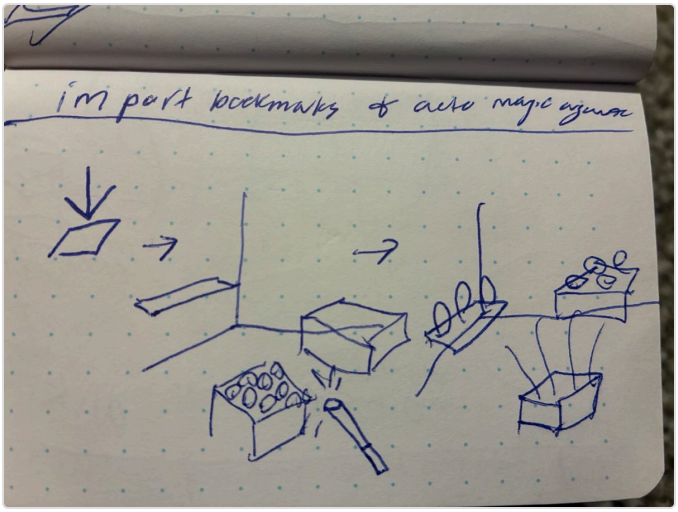

Zoomed-in detail shot. Three objects on a shelf ready for interaction: sleeping cat, CRT TV, yo-yo. Preview cards float above each when clicked — music player UI above cat, play button above TV, retro game above yo-yo. Items remain static on shelf.

Interactive moment showing what previews look like when hovering over shelf items.

SHOT 6

0:40–0:53

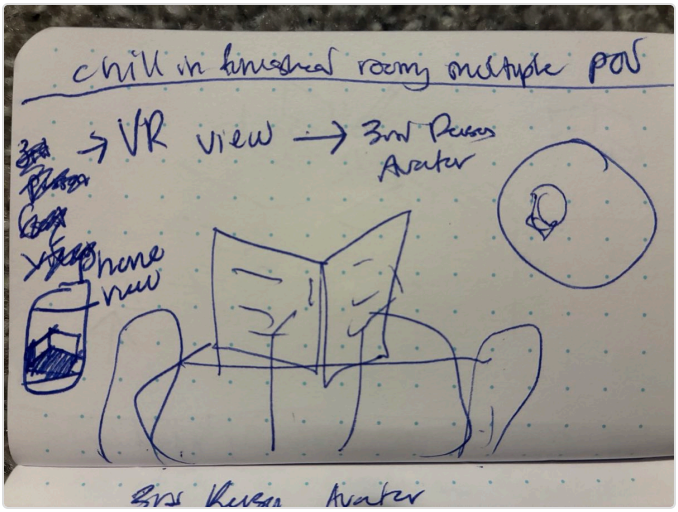

CONCEPT SEQUENCE

God's-eye view. A box of imported bookmarks opens, a wand waves, and objects curve out to their thematic zones and settle.

Label "CONCEPT SEQUENCE" on screen throughout — this is aspirational, not a shipped feature. Dialogue from Shot 5 may continue here.

SHOT 7A

0:48–0:53

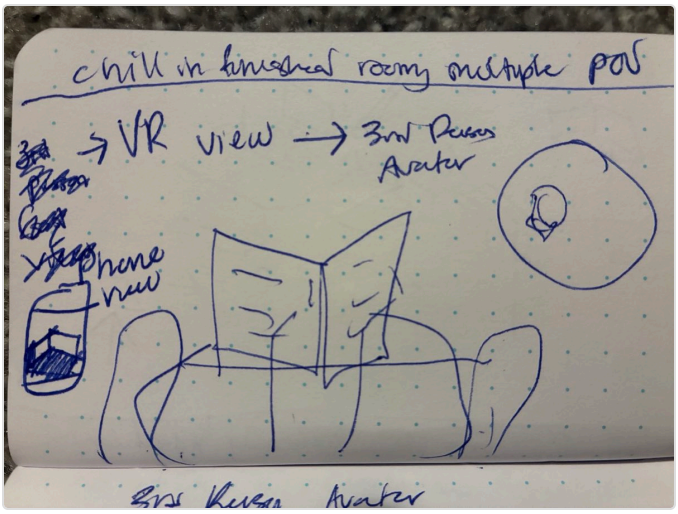

Phone / web view. The room on a handheld screen at reduced scale, UI around it, isometric angle intact.

> **GERMAN (VO)**
> *"Venture out and see what others have to share..."*

Show only the phone displaying the web app — no hand holding it.

SHOT 7B

0:53–0:58

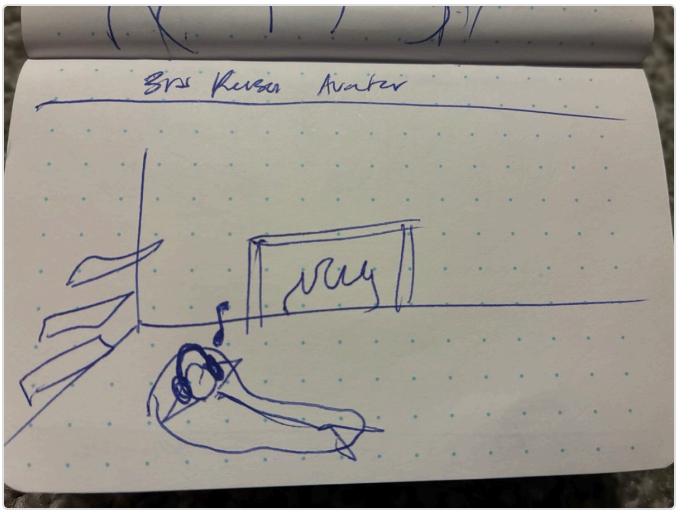

REAL VR CAPTURE

First-person headset POV, seated. Head turns left → forward → right across ~35°. Objects at human scale, fireplace looming and warm.

Must be genuine headset footage. Do not fake or composite.

SHOT 7C

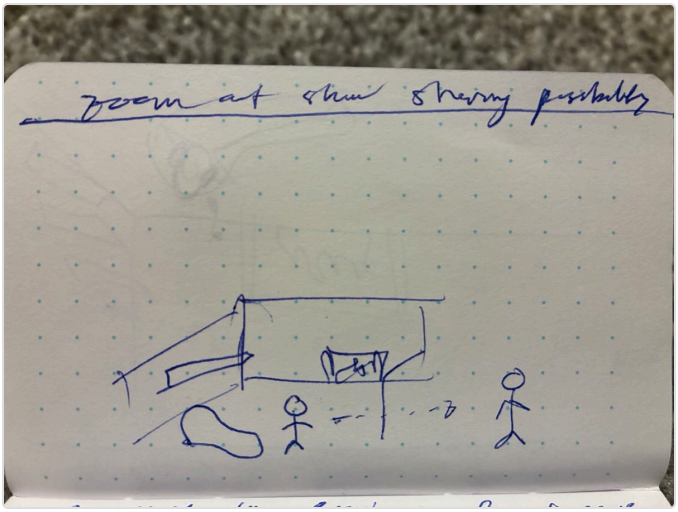

0:58–1:02

Isometric 3/4 third-person. The avatar lounges in headphones, relaxed, gently bobbing to music. Room wraps around them.

Goal: ownership and comfort in a space that's yours.

SHOT 8 · A 1:02–1:14

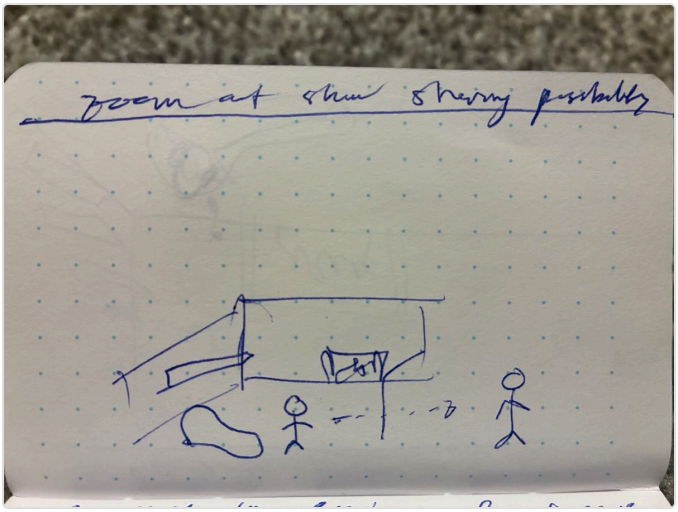

The avatar heads for the door. Camera pulls back and tilts up — and there are other people out there.

Sketch note: "zoom out, show sharing possibility".

SHOT 8 · A

1:02–1:14

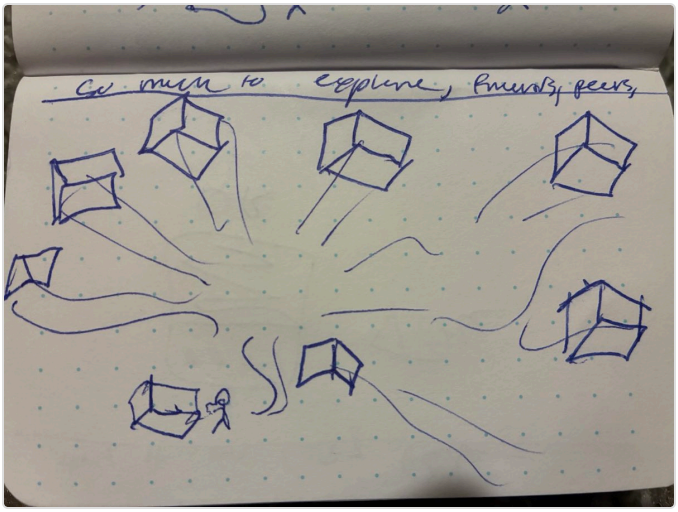

The avatar heads for the door. Camera pulls back and tilts up — and there are other people out there.

Sketch note: "zoom out, show sharing possibility".

SHOT 8 · B

1:02–1:14

Wide on the neighbourhood: a scatter of voxel rooms joined by winding paths, golden-hour light. Quick pans across a plant room, a music room, a creative room, a cosy room.

Sketch note: "so much to explore — friends, peers".

SHOT 9 · END CARD

1:14–1:18

Static card on warm ground. Title, tagline "A room for your favorite things", CTA, and a QR / URL. Held 4s, no movement.

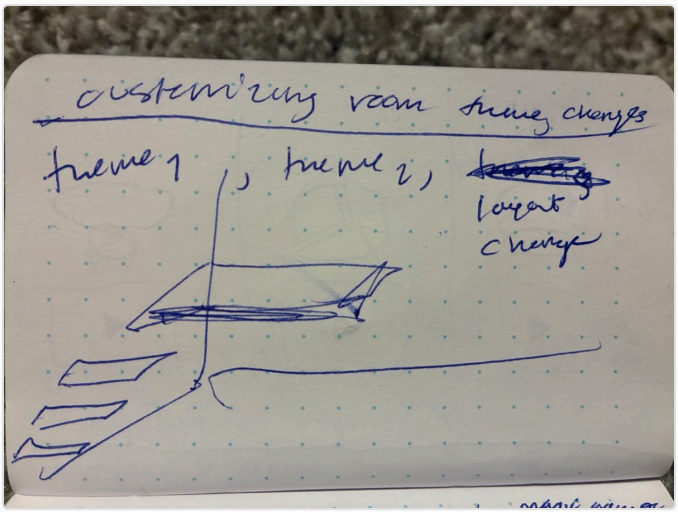

GERMAN (VO)

"Try it now on Miscellaneous Manor."

URL and QR must be real and tested before export. No placeholders.

APPENDIX

unassigned

NOT IN CURRENT CUT

Room customisation — theme 1, theme 2, layout change. The personalisation pitch.

Parked. Would slot after Shot 5 or replace Shot 6. The cut is already ~75s against a ~60s target, so this costs time elsewhere.

14 sketches · 9 shots (11 panels)
Runtime ~75s — trim Shots 6–8 by ~15s for a hard 60s
